

Certified Scrum Product Owner (CSPO®) Course

As a CSPO, you create the product vision, order the Product Backlog, and make sure the best possible product is built.

- ✓ Scrum Alliance Provider
- ✓ Australian-Based
- ✓ World-Class Trainers

WHY REDAGILE

What is a CSPO?

The Product Owner is crucial in maximising the value of the work done by the Scrum Team. The PO sets the product goal and prioritises the most valuable work to achieve that goal. Working closely with stakeholders and developers, the Product Owner is focussed on creating products iteratively and incrementally to deliver value for customers.

SYLLABUS

Learning Outcomes

- Introduction to agile and how to operate in a climate of complexity and rapid change.
- Participate in an end-to-end simulation to learn product ideation, discovery and build.
- From a Product Owner point-of-view, gain a deep understanding of the role within a Scrum Framework, picking up tips, tricks and traps from RedAgile experts.
- Learn the practical tools of any Product Owner, including lean canvas, the product roadmap and 'bang-for-your-buck'.
- Understand the needs and wants of customers using low-definition prototypes and empathy mapping.
- Know how a Product Owner manages the Backlog and how to priorities the work.
- Experience how the Product Owner works within a Scrum Team from inception to delivery.
